Qualities

Autonomous

Fast learner

Curious

Team work

Versatile

Languages

 French: native

 English: fluent + professional

Hobbies

Hiking, climbing, cycling, coding, reading, learning, tech, news, geopolitics, sci-fi, cyberpunk, solarpunk, photography, museums, bikepacking...

International software engineering student specializing in robotics. Founded a hackerspace, forged a key industry partnership and public speaker as a board member of the student association. Passionate about technology, I'm constantly learning, ready to build things that matter. Portfolio: tcardaire.me

} education() {

Software Engineering: 42 Luxembourg Oct 2024 → Jul 2026

Project based curriculum, low level programming, peer to peer educational system.

- C/C++ Programming
- System Programming
- Unix/Linux
- Algorithms & Data Structures
- Software Architecture
- Debugging & Troubleshooting
- Git Version Control
- Test-Driven Development (TDD)
- Agile Collaboration
- Problem Solving & Critical Thinking
- Technical Communication
- Autonomous Learning
- Team work

Professional Training: Industrial Robotics Mastery: Programming, Vision Systems, and Advanced Robotics Automation Digital Learning Hub, Jul 2026

- robotic control algorithms.
- precision movement.
- safety protocols.
- vision-based quality inspection.
- pattern and object recognition.
- IIoT integration for networked automation systems.

Double Master of International Marketing of Innovation & MBA  
IAE Toulouse (TSM) & Bangkok Assumption University, Sept 2022 → June 2024

French-Danish Bachelor: Business and Communication  
VIA University College, Horsens (Denmark), Aug 2021 → June 2022

}
